Celebrating AFRICAN AMERICAN HERITAGE — and — WELLNESS

Did you know that **high blood pressure, or hypertension**, puts pressure on blood vessels and strains the heart, which may result in heart attack, stroke, eye problems or kidney problems?¹

African-Americans develop high blood pressure earlier in life and have higher average blood pressure rates compared with other ethnicities.²

Lifestyle changes to help manage or prevent high blood pressure include a heart-healthy, low-salt diet, limited alcohol intake, maintaining a low cholesterol level and routine physical activity.³

See Page 13 for a great heart-healthy offer.
